## Professional Summary

Full-Stack JavaScript Developer and Systems Analyst, constantly updating my skills through courses and technological education. I strive to implement best practices and methodologies within projects and business models. I have worked with Python and Java as a foundation for Structured Programming and Object-Oriented Programming, and now JavaScript as my primary language.

## Work Experience

**IT Internship** - FAETEC-Quintino                                    08/2023 - 12/2023
Technologies: JavaScript, Power BI, Excel

- Helped IT team install, configure, and maintain computer systems, networks, and equipment;
- Assisted in updating software and operating systems, as well as testing new tools and applications;
- Provided support documenting processes and creating internal IT manuals and policies;
- Automated processes and data collection, reducing manual work by 20%;
